

Leadership Team

Peter Termyn, President & CEO

Pete previously directed the company's commercial organization and lead efforts to unlock the company's growth potential. He has twenty-five years of technical, commercial and business unit management experience in the semiconductor, fluid transfer, chemical, automotive and engineered products industries. He held previous roles with industry leaders such as Dresser Industries, ITT Corporation, BOC Group and Tyco International. He holds an MBA and dual BS degrees in Chemical Engineering and Materials & Metallurgical Engineering from the University of Michigan.

Greg Silva, Vice President & CFO

Greg is responsible for all financial and administrative functions. He has nearly 20 years of finance experience in manufacturing operations and he is extensively trained in lean manufacturing principles. He is a graduate of Bryant University and a Certified Public Accountant. His previous experience includes financial management, planning and auditing roles with Long Reach Holdings, Inc., Stanley Works and Ernst & Young LLP.

Ken Cavanagh, Vice President - Technology & Product Development

Ken leads the company's R&D, product development and pilot plant facilities. He has over thirty years experience in machine design, plastics processing and web handling systems. He previously held engineering management positions at Toray Plastics (America) and Marshall & Williams Plastics. He holds a B.S. in Mechanical Engineering from The University of Rhode Island and is an active member in professional organizations that advance plastics processing and web handling technologies.

Stephen Montalto, Director of Sales & Marketing

Stephen leads the company's commercial efforts, including field service activities. He was previously Vice President of Sales for Process Control Corporation and had prior technical and commercial roles of increasing responsibility with Sano/Black Clawson and Davis Standard. He holds engineering and management degrees from Thames Valley State Technical College and Albertus Magnus College and an MBA from the University of New Haven.

David Dziadzio, Director of Engineering

David is responsible for overseeing all aspects of electrical and mechanical engineering. With over 20 years of machine design experience, David has held management roles in companies such as Thermo Electron, Mea Westvaco, Hasbro, and Magnat Fairview. He has held roles throughout a variety of industries including paper, converting, automation, plastic injection molding & extrusion. He holds a BS degree in mechanical engineering from Western New England College.

Peter Galanis, Operations Manager

Peter is responsible for the performance of the manufacturing, assembly, panel, purchasing, and shipping/receiving departments throughout Parkinson and its affiliated brands. He holds an MBA from Northeastern University. His prior experience includes positions such as Quality Manager at Capstan Atlantic in Wrentham, Mass. Before that he was Director of Quality at Temptronic Corporation and Purchasing Manager at Dynisco, Inc.
